

GDPR Compliance

Protecting your privacy is important to Dynflux, Inc

At Dynflux, Inc Commerce, we take the protection and handling of personal information very seriously.

We do this not only because of legal requirements, but because we hold integrity as one of our core company values.

Making sure that merchants (and their customers) can trust that our team will keep their personal and financial information safe is vital, and frankly, something we obsess over each and every day.

What is GDPR?

The General Data Protection Regulation (GDPR) creates a new set of legal requirements that aim to better protect the personal data of residents of the European Union. This includes more stringent rules on how and where data can be disclosed, stored, and processed.

To help our merchants be confident that Dynflux, Inc takes data security seriously, we've compiled a list of things we've done that help us meet the high standards set by the GDPR, including:

- Updating our Privacy Statement
- Consent and Lawful Basis for Processing
- Data Subject Rights
- Data Processing Addendum
